### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 1-16 have been carefully considered in light of the specification. The references of the record, especially Publication No. 2004/0130918, fail to teach or suggest claim 1: the method of disposing three maximum phase voltage vectors each having an equivalent angle interval corresponding to maximum values of each phase voltage; setting maximum phase voltage vector regions by predetermined angles with respect to each of the maximum phase voltage vectors; setting minimum phase voltage vectors corresponding to the maximum phase voltage vectors in between the maximum phase voltage vector regions; obtaining a desirable voltage by turning on a first switch and turning off a second switch, both connected to the phase terminal of a corresponding maximum phase voltage in each maximum phase voltage vector region; and changing a duty ratio of control signals with respect to the other switches corresponding to the other two phase voltages. The references of the record fail to teach or suggest the maximum phase voltage vector regions, the setting minimum phase voltage vectors corresponding to the maximum phase voltage vectors in between the maximum phase voltage vector regions and the switching functions as recited in the claim.

Claim 16 has been carefully considered. The claim recites logical calculation appearing in terms of mathematical algorithm. However, a careful consideration of the claim language, the claim further recites structural limitation and post solution limitations incorporated with the recited logical calculation. The claim has fulfilled to overcome the 35 U.S.C. 101 requirements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
